

With love from America The M825A1 phosphorus round

From *The Times*, January 8th, 2009:

“Photographic evidence has emerged that proves that Israel has been using controversial white phosphorus shells during its offensive in Gaza, despite official denials by the Israel Defense Forces. There is also evidence that the rounds have injured Palestinian civilians, causing severe burns. The use of white phosphorus against civilians is prohibited under international law.”

GAZA IS THE MOST DENSELY POPULATED AREA ON THE PLANET. YOU CANNOT FIRE MISSILES AT IT WITHOUT KILLING CIVILIANS. WITH U.S. WEAPONS SHIPMENTS TO ISRAEL, PAID FOR WITH OUR TAX DOLLARS, WE ARE QUITE LITERALLY ENABLING ISRAEL TO COOK ARAB BABIES. SCATTERED ACROSS GAZA, METAL FRAGMENTS BEARING “MADE IN USA” ARE OUR AMBASSADORS. ENOUGH IS ENOUGH.
